Demo User — Backend Engineer

demo@momentum.app

SUMMARY

As a Machine Learning Engineer eager to contribute strong foundations in machine learning, expertise in PyTorch/JAX, and proficiency in working with production ML systems running on GPUs, I am well-suited for the Member of Technical Staff role. My experience in training, fine-tuning, and deploying ML models, coupled with my ability to write production-quality code and adapt to new technologies, makes me an ideal candidate for the job.

EXPERIENCE

{'Job Title': 'Backend Engineer', 'Company': 'Company Name', 'Location': 'City, Country', 'Dates': 'Start Date - End Date', 'Responsibilities': 'Built REST APIs, optimized database queries, and deployed services on AWS ECS and Lambda.\nStrong background in distributed systems, microservices, and CI/CD pipelines.'}

SKILLS

Python, FastAPI, PostgreSQL, AWS | REST APIs, Database Optimization, Deployment on AWS ECS and Lambda | Distributed Systems, Microservices, CI/CD Pipelines
