Demo User — Backend Engineer

demo@momentum.app

SUMMARY

As a Backend Engineer with a strong background in machine learning and Python, the individual possesses a solid understanding of PyTorch/JAX, production ML systems, and expertise in building REST APIs, optimizing databases, and working with AWS services. With a proven ability to develop production-quality code, they have experience in training, fine-tuning, and deploying ML models, demonstrating a bias toward shipping, iteration, and continuous improvement. As a Member of Technical Staff, they bring strong foundations in machine learning, a keen eye for debugging, and the capacity to work with ambiguous tasks, growing into ownership over time.

EXPERIENCE

{'Job Title': 'Backend Engineer', 'Company': 'Company Name', 'Location': 'City, Country', 'Dates': 'Start Date - End Date', 'Responsibilities': 'Built REST APIs, optimized database queries, and deployed services on AWS ECS and Lambda.\nStrong background in distributed systems, microservices, and CI/CD pipelines.'}

SKILLS

Python, FastAPI, PostgreSQL, AWS | REST APIs, Database Optimization, Deployment on AWS ECS and Lambda | Distributed Systems, Microservices, CI/CD Pipelines
